Analyzing Your AsULearn Course for Accessibility Issues

Introduction

The Brickfield+ Accessibility Toolkit is an optional feature of AsULearn, and you must voluntarily submit your course for analysis to use it. You are not required to use Brickfield+, but we do strongly recommend it. This tool is exclusively available to instructors. Your students cannot see or review any results of this analysis.

Need help interpreting the results of your analysis? Please open a support request.

This article covers how to submit your course for an automated analysis, and review the results.

Analyzing and reviewing your course

1. From your course home page, in the Course Menu along the top, click the More item and select Brickfield Accessibility+ Toolkit.

You will be notified that your course is not yet been scheduled for evaluation, and receive a detailed explanation of what is included in this accessibility check.

2. Click the Submit for analysis button.

This course has not yet been scheduled for analysis, to find common accessibility issues.

By clicking on the "Submit for analysis" button, you confirm that you want all your relevant course HTML content, such as course section descriptions, activity descriptions, questions, pages, and more, to be scheduled for analysis.

This analysis will conduct multiple common accessibility checks on your course HTML content, and those results will then display on these Accessibility+ Toolkit report pages.

Please view the Accessibility+ Toolkit help page for further details.

This analysis will be processed in the background, by the Moodle scheduled tasks, so its speed of completion will depend on task timings and task run schedules.

You will be returned to your course's Reports page (also available in the Course menu), and a notice will display indicating your course has been scheduled for analysis.

Students cannot see this banner.

How long does a review take?

The automated review process can take up to 15 minutes to complete.
1. Turn **editing on** in your course.

2. Open the **block drawer**.

3. With the block drawer open, click **Add a block**.

4. Select **Accessibility+ Review** from the list of available blocks.

- The page will refresh, and your block will appear in the block drawer.
- The Accessibility+ Review block may not be the first block in the block drawer. Keep scrolling until you see it.
- If "Accessibility+ Review" is **not** listed in the **Add a block** menu, it's likely already been added to your course. Review the blocks in your block drawer.

5. When your voluntarily submitted course analysis is complete, the summarized results will display in the Accessibility+ Review block.
