Panopto and AsULearn

Panopto is Appalachian's classroom "Lecture Capture" tool, chiefly used to record a traditional face-to-face physical class meeting with students. It is integrated with AsULearn, our course management system, and the directions for adding the Panopto block to your course and "provisioning" it in Panopto are listed below. Here are some Panopto use cases:

- Recording a face-to-face class meeting, using the Panopto recorder on the podium in the classroom to capture the podium's desktop, and feeds from any attached microphone and webcams. Note that on most podia around campus, you'll need to bring in a microphone to capture your voice! Links to the recordings are automatically posted to the Panopto block in your course.
- Some faculty use Panopto as a 'desktop capture tool' -- using the Panopto recorder on their personal computer to record their desktop/webcam /audio -- to create tutorials for use in online and/or face-to-face courses. Links to the recordings are automatically posted to the Panopto block in your course.
- Some faculty also upload existing video to Panopto to stream it into their AsULearn course site. Concerned about students staying engaged while watching video content? Panopto has the ability to embed quiz questions during the video that display at any time index you choose to help your students focus on learning objectives, and get the most out of your media examples.

Add the Panopto block to your AsULearn course

Step-by-step guide

To add the Panopto block to your course, and "provision" it with Panopto, follow these steps.

1. From your AsULearn course homepage, click the gear icon at the top right, the select Turn editing on

   - Edit settings
   - Turn editing on
   - Filters
   - Gradebook setup

2. At the top left of your course page, click the 3-line hamburger button to open the drawer from the left (if it is currently closed)

   3.2 Sample Course

   Dashboard / My courses / CAE / CAE Test Courses
3. Scroll to the very bottom of the drawer, and click **Add a block**

   ![Add a block](image)

4. In the list of blocks that appears, select **Panopto**

   ![Panopto block](image)

5. The Panopto block will appear on the right side of the course page. Note: You can move the block up or down by clicking/holding/dragging the cross icon

   ![Provisioned Panopto block](image)

6. To provision your course in Panopto, click **Provision Course** in the Panopto block. After the course is provisioned, click **Back to course**. You'll see your connected Panopto block as below. Note that you can download the Panopto recorder (for Win or Mac) to your computer via the link that always shows in the block. A correctly provisioned Panopto (with no recordings) will appear as below

   ![Provisioned Panopto block](image)
You should now have a working Panopto block, and links to recordings made in that course's folder will automatically appear there for your students. Contact your LTS consultant for further assistance.
