A

- [Acrobat Pro](#) — The Acrobat Pro software package has been included in the Adobe Creative Cloud software package. For more information on installing Creative Cloud, please visit our [Adobe Creative Cloud support page](#). Assistance: For questions regarding use, call the Help Desk at 828-262-6266.
- [Adobe Creative Cloud](#) — Adobe Creative Cloud is a software suite for graphic design, video editing, and web development applications. All faculty and staff are provisioned for an Adobe Creative Cloud license, which includes Adobe Products such as Photoshop, InDesign, Illustrator, Acrobat Pro, and several others. (For a full list of programs included in our Creative Cloud license, please view the [Creative Cloud for Enterprise product listing](#) here.)
- [ArcGIS](#) — ArcGIS is a geographic information system for working with maps and geographic information to create and use maps, compile geographic data, analyze mapped information, share and discover geographic information, and managing geographic information in a database. Note: This Software is only available on Windows Operating Systems. Personal Machines: Students, faculty and staff can get ArcGIS for their personal computers at no charge. You will need to fill out the request form below in order to get a license key emailed to your ASU email, then use the download link below to download the software onto your machine. License Request Form Download Installer (Current version: 10.5.1; Requires you to log into your appstate gmail account) Please feel free to contact the IT Support Center in Anne Belk Hall for installation help. Install Instructions (DOCX, 156 KB)
- [Audacity](#) — Audacity is an open source software application used for recording, editing, and post-processing all types of audio.
- [AutoCAD](#) — AutoCAD is a software application used for Computer-Aided Design (CAD) and drafting in 2D and 3D formats. AutoCAD Software: AutoCAD Architecture AutoCAD Civil 3D AutoCAD Electrical AutoCAD Map 3D AutoCAD Mechanical AutoCAD MEP AutoCAD Plant 3D AutoCAD Raster Design AutoCAD Structural Detailing AutoCAD Utility Design AutoCAD Alias Design AutoCAD Infrastructure Modeler Autodesk Inventor Professional Autodesk Mudbox Autodesk Navisworks Manage Autodesk Quantity Takeoff Autodesk Revit Autodesk Robot Structural Analysis Professional Autodesk Showcase Autodesk Simulation Moldflow Adviser Ultimate Autodesk Simulation Multiphysics Autodesk Sketchbook Designer Autodesk 3DS Max Design Autodesk Vault Basic For questions about the software or technical support, please contact Charles Davis at 828.262.7925 or daviscj@appstate.edu
- [Autodesk Maya](#) — Autodesk Maya is a 3D computer graphics software used to create interactive 3D applications including video games, animated film, TV series, and visual effects.

[TOP](#)

B

- [Boardmaker](#) — Boardmaker is a software package used for creating assistive tools for printed materials such as schedules, sequences, worksheets, and communication boards.
- [Bomgar](#) — Bomgar is a remote support solution which allows technology support professionals to access and control systems and devices remotely, including personal computers, some smart phones, and some tablets.

[TOP](#)

C

- [Camtasia](#) — Camtasia is a software application used for creating video tutorials and presentations via screen video capture recording, post-production editing (including the addition of audio), and deployment with various video formats. Camtasia is available through the Software Center.
 - [CyberDuck](#) — CyberDuck is an open source FTP and SFTP, WebDAV, Cloud Files, Google Docs, and Amazon S3 client.
-

[TOP](#)

D

- [Dragon](#) — Dragon NaturallySpeaking/DragonDictate is a speech recognition software package that enables the user to dictate and have speech transcribed as written text. Documents can also be synthesized as an audio stream.
-

[TOP](#)

E

- [Endnote](#) — EndNote is a software package used to manage bibliographies and references. EndNote is available through the Software Center or via download for personal machines. EndNote 7/8 - Available online (Requires Login)
-

[TOP](#)

F

- [Fathom](#) — Fathom is a dynamic data software used for learning and teaching a variety of mathematical subjects including algebra, precalculus, and statistics, and their integration into the physical, biological, and social science courses.
 - [Fetch](#) — Fetch is a GUI-based FTP client made for Mac OS.
 - [Filemaker Pro](#) — Filemaker Pro is a database application that integrates a database engine with a GUI-based interface, allowing users to modify the database by dragging new elements into layouts, screens, or forms.
 - [FileZilla](#) — FileZilla is a secure FPT/SFTP client that allows you to transfer files over the internet.
 - [Firefox](#) — Mozilla Firefox is a web browser developed for Windows, OS X, Linux, and Android.
 - [Flip4Mac](#) — Flip4Mac is a digital media tool that includes the only QuickTime component for Mac OS X that also supports Windows Media Video.
 - [Fugu](#) — Fugu is an SFTP client for OpenSSH tools.
-

[TOP](#)

G

- [GarageBand](#) — GarageBand is a software application used as a digital audio workstation and music sequencer that can record and play back multiple tracks of audio. It's most commonly used for podcasts and the creation of music.
 - [Gaussian](#) — Gaussian is software used for computational chemistry.
 - [GeoMapApp](#) — GeoMapApp is a marine geoscience data system that provides direct access to the Global Multi-Resolution Topography compilation that hosts high resolution bathymetry from multibeam data for ocean areas and Advanced Spaceborne Thermal Emission and Reflection Radiometer and National Elevation Dataset topography datasets for the global land masses.
 - [Geometer's Sketchpad](#) — The Geometer's Sketchpad is an interactive geometry software program for learning and exploring Euclidean geometry, algebra, calculus, and other areas of mathematics. For assistance using this software, please contact the ASU Mathematics Department.
 - [Google Add-Ons](#) — These add-ons are available for individual install from Google Workspace Marketplace
 - [Google Chrome](#) — Google Chrome is a web browser developed by Google.
 - [Google Earth](#) — Google Earth is a virtual globe, map and geographical information program that uses satellite imagery, aerial photography and GIS 3D globe to superimpose images to map the Earth.
-

[TOP](#)

H

- [Hawkes Learning System](#) — Hawkes Learning Systems specializes in mathematics software and textbooks and provides a comprehensive system for teaching and learning mathematics.
-

[TOP](#)

I

- [Internet Explorer](#) — Internet Explorer is a graphical web browser included as part of the Microsoft Windows line of operating systems.

[TOP](#)

J

- [Java](#) — Java is a set of several computer software products and specifications that provide a system for developing application software and deploying it in a cross-platform computing environment.
- [JMP](#) — JMP dynamically links statistics and graphs to explore, understand, and visualize data using simple statistical tools. All SAS software has been provided free as part of a \$3 million grant from SAS Institute to the University of North Carolina system. Version 9.3 on the Alpha/VMS cluster and Windows Base SAS, SAS/STAT, plus 20 subsystems Enterprise Guide - point and click access to SAS JMP - interactive statistical graphics (for Windows and Mac) SAS Enterprise Miner for Data Mining Is available to faculty, staff and students for home computers (visit Educational Media Services or use the Application Launcher on your office computer) Obtain a license: Log in Fill out this form to get your license file Download the installer here (requires login with your appstate gmail account).

[TOP](#)

K

- [Kurzweil 3000](#) — Kurzweil Education Systems specializes in providing reading and writing software to assist people who are blind or partially sighted or have learning disabilities. Kurzweil 3000 provides a reading, writing and study platform aimed at people with learning disabilities or other disabilities that make reading or writing difficult. It's used to support people with Dyslexia, Dysgraphia, English Language Learners in school, higher education, at home and in the work place.

[TOP](#)

M

- [Maple](#) — Maple is a computer algebra system where users can enter mathematics in traditional mathematical notation. There is support for numeric computations, arbitrary precision, and symbolic computation and visualization.
- [MATLAB](#) — MATLAB is a numerical computing environment and programming language that allows matrix manipulations, plotting of functions and data, implementation of algorithms, creation of user interfaces, and interfacing with programs written in other languages, including C, C++, Java, and Fortran. Licensed products for MATLAB Software: Bioinformatics Toolbox Parallel Computing Toolbox Image Processing Mapping Toolbox Neural Network Toolbox Optimization Toolbox Partial Differential Equation Toolbox SimBiology Signal Processing Toolbox Symbolic Math Toolbox Statistics Toolbox Wavelet Toolbox
- [Microsoft Office](#) — Microsoft Office is comprised of administrative, communications and business applications. Microsoft Office 365 Students, faculty and staff can now download the Microsoft Office 365 Suite free of charge using their university credentials. Microsoft Word Microsoft Excel Microsoft PowerPoint Microsoft Outlook Microsoft OneNote Microsoft OneDrive Microsoft Publisher (PC only) Microsoft Access (PC only) Microsoft Office Windows: Microsoft Access Microsoft Excel Microsoft InfoPath Designer Microsoft InfoPath Filler Microsoft OneNote Microsoft Outlook Microsoft PowerPoint Microsoft Publisher Microsoft SharePoint Workspace Microsoft Visio Microsoft Word Microsoft Office Mac: Microsoft Connection Microsoft Excel Microsoft Outlook Microsoft PowerPoint Microsoft Word Microsoft Office is available through Software Center for University Machines.
- [Microsoft Visio Pro](#) — Microsoft Visio is a diagramming and vector graphics application.
- [Microsoft Windows](#) — Microsoft Windows is a series of graphical interface operating systems developed, marketed, and sold by Microsoft.
- [Minitab](#) — Minitab is a statistics package that features data and file management, regression analysis, power and sample size, tables and graphs, multivariate analysis, nonparametrics, time series and forecasting, statistical process control, measurement system analysis, and analysis of variance.

[TOP](#)

N

- [NaturalReader](#) — NaturalReader is a text-to-speech software that can read text from applications including, Microsoft Word, files, webpages, PDF files, and email. These can be converted to audio files in MP3 and WAV formats and also works with OCR software.

[TOP](#)

S

- [Safari](#) — Safari is a web browser included with the Mac OS X and iOS operating systems.
- [SAS](#) — SAS is a system of software products that assist programmers in a variety of areas including (but not limited to) data management and warehousing, statistical analysis, business planning, operations research, applications development, and remote computing. All SAS software has been provided free as part of a \$3 million grant from SAS Institute to the University of North Carolina system. Version 9.3 on the Alpha/VMS cluster and Windows Base SAS, SAS/STAT, plus 20 subsystems Enterprise Guide - point and click access to SAS JMP - interactive statistical graphics (for Windows and Mac) SAS Enterprise Miner for Data Mining Is available to faculty, staff and students for home computers (visit Educational Media Services or use the Application Launcher on your office computer) Obtain a license: Log in Fill out this form to get your license file Download the software here (requires login with your appstate gmail account). For installation help, follow along with this SAS installation tutorial (DOCX).
- [SigmaPlot](#) — SigmaPlot is software used for graphing and data analysis.
- [SketchUp](#) — SketchUp is a 3D modelling program for architectural, civil, mechanical, film, and video game design applications.
- [Snagit](#) — Snagit is a screen capture software that captures video display and audio output.
- [SPSS/AMOS](#) — SPSS Statistics is a software package used for statistical analysis. Statistics features included in the base software include descriptive statistics, bivariate statistics, predictions for numerical outcomes, and prediction for identifying groups. SPSS/AMOS Statistical Software for the Social Sciences Base SPSS, Advanced Statistics, Regression Models, Tables and Trends Available to faculty and staff for University-owned machines (Contact your IT Consultant or use the Software Center or Self Service Application on your office computer)
- [Stata](#) — Stata is a statistical software package used mostly for research in the fields of economics, sociology, political science, biomedicine, and epidemiology.
- [SYSTAT](#) — SYSTAT is a statistics and statistical graphics software package.
- [System Center Endpoint Protection](#) — System Center Endpoint Protection is a business antivirus software product that can be controlled over the network.

[TOP](#)

T

- [The Food Processor](#) — The Food Processor is a nutrition and fitness software that uses a database for comprehensive nutrition analysis.
- [Thunderbird](#) — Mozilla Thunderbird is a free, open source, cross-platform email, news, and chat client.
