How to login to Adobe Creative Cloud

In order to access the Adobe Creative Cloud Apps, users must first login with their Appalachian State credentials. It’s important to use Appalachian State’s Single Sign-on solution.

Note that students will use this same, single sign-on method, but only on public access lab computers that already has all of the apps installed. The one exception to using the enterprise option would be for a student who has a paid Adobe account using their Appstate email address. In that case, students would choose the personal ID option. Your on-screen graphics may vary slightly from what is below.

Step-by-step guide

   a. On a Windows computer, open the Adobe Creative Cloud app from your desktop or from the start menu in the lower left corner of the screen.
   b. On a Mac, click on the Adobe Creative Cloud app logo in the upper right corner of the screen or find the app in your applications folder.

2. Enter your AppState email address and then click the blue "Continue" button. Alternatively, selecting the "Continue with Google" option will also work.

3. You will be redirected to the Appalachian State Single Sign-in window. Enter your AppState username and password.
4. You will be redirected to theAppState DUO Mobile screen. Select your authentication method.

5. For faculty and staff, once you’re logged in, click on the Apps tab. You can install or open any application available in the suite. For students in a computer lab, the Apps tab will be blank with a message about not having rights to install the apps, but they are already installed and can be accessed from the Start menu on a PC or the Applications folder on a Mac.
