

Use the Confluence Add-On Scaffolding Forms & Templates

If you need forms, living templates, or forms in templates, use Scaffolding Forms & Templates

Step-by-step guide

1. Review the [Scaffolding for Confluence documentation](#). The [Tutorials and Guide](#) are especially helpful.
2. [Use Cases](#) - include examples with Comala Workflows data
3. Scaffolding includes many macros to create forms. See the [Macro Reference guide](#) for details.
4. Be aware of how pages with scaffolding behave with the Confluence mobile app: they do not display the values from the Scaffolding forms and point to a "use desktop version" link which brings you to a webpage with the Confluence page. The values from Scaffolding are displayed in the website.
