

Course Formats in AsULearn Sites

Choose a format to determine how sections or topic blocks will behave on your course page. The topics format is the default in AsULearn.

Step-by-step guide

1. From the main course page, select **Settings** from the **gear** icon (top right).
2. Within the settings page, toggle to view the course format options.

3. Select the desired format for the site.

Flexible Sections: Similar to Topics format except that it is possible to add subsections within a topic and each section can be shown expanded or collapsed.

Grid format: A modular and visual course format. Hides all topics and creates a grid of icons (one for each topic) with short titles. Clicking on an icon brings up the content from the corresponding topic.

Kickstart format: Select a template with ready-made content to get you started.

Topics: Course Sections appear as blocks that do not collapse and are always open.

Collapsed Topics: Allows individual users to expand and collapse the course Sections. This format avoids the need to scroll down a very long page to access the bottom sections of a course.

Weekly Format: Organizes course Sections by week, with a clear start and finish date. AsULearn creates and names a section for each week of your course based on the Start date listed

4. Click the Save and Display button at the bottom of the page to retain any updates.
