Set Up a Mac to Print to a Sharp Multi Function Printer

Instructions for installing a networked Sharp MFP onto a Mac which has been imaged with an Appalachian State University build. Also included in the instructions are how to set up user codes in a print driver if the copier is set up with them.

These instructions will only work for Mac computers with an official ASU build on them.

Step-by-step guide

1. Click the **Spotlight** icon in the top right corner of the Menu Bar.

2. Search for **Self Service** and select that option.

3. Once opened, select **ASU-Print and Scan** from the menu on the left and then click **Install** underneath Sharp Printer Drivers. This will insure that you have the driver that you need to add the MFP.
4. Once you have been notified the drivers have been installed, click **Run** underneath **Printer Setup Tool**. This may take a minute or so to run.

5. The Printer Setup Tool will open and there will be a **Drop Down Box** for you to select your printer. After selecting the printer you wish to install, click **Add**.

   *If you do not know the name of your Sharp printer, look at the orange tag on the front of the machine.*
6. Click on the **Spotlight** icon in the top right corner of the Menu Bar.

7. Search for **Printers & Scanners** and select that option.
8. Once the MFP is installed, you can select **Options & Supplies** to configure additional equipment that is on the machine.

9. Click the **Options** tab and select the correct configuration for the MFP. Click **OK**. (Your options will vary based on the configuration of your machine. Please use this link, , to find the options for your Sharp)
Adding User Codes to a Print Driver if Needed

Open a program up on the Mac, for this setup, we will be using Microsoft Word.

1. At the top left of the screen, click on **File** and then click on **Print**.

2. Click **Copies & Pages** and a new list will appear. Select **Job Handling**.
3. Select the **Authentication** tab and click the bubble next to **User Number**. Enter the user code that has been assigned. Remember to click the **Lock** icon so that the code is not forgotten in the driver. If the **Lock** is not showing, no need to worry, our new drivers do not have this option.

4. After locking the code in, click where it says **Default Settings** next to **Presets**. Select **Save Current Settings as Preset**.

5. Name the Preset whatever you would like so that you are reminded to use this setting when using the Sharp MFP. Click **OK**.
