Using Web Applications Accessibly

Google Mountaineer Apps

It is important that accessibility is considered when using the G Suite tools for online collaboration, organization, and productivity with the campus community. View the G Suite user guide to accessibility or contact IT Support Services for help.

AsULearn (online courses)

There are a variety of tools in AsULearn that can be used to make online course content accessible - such as the accessibility checker and the screenreader helper in the text editor, as well as overrides to extend the time for online quizzes. Visit AsULearn Support to learn more or contact the Center for Academic Excellence for support.

Drupal (department websites)

Contact Web Services for assistance with accessibility in Drupal.

Networking and communication tools

The guides for creating accessible online content provided here apply to any framework where content will be consumed online. The accessibility tools provided in any communication application (i.e. MailChimp, iContact, iModules, AppSync, Facebook, Twitter, Instagram, etc.) should be utilized to ensure these requirements are met.
