

Creating Course Types

Workshop Course Types are the various workshop categories under your Department Name that your office will offer. It is important to come up with categories that each of your workshops could fall under. A course type should be a broad category that most of your workshops fall under. Having too many categories can be confusing for registrants.

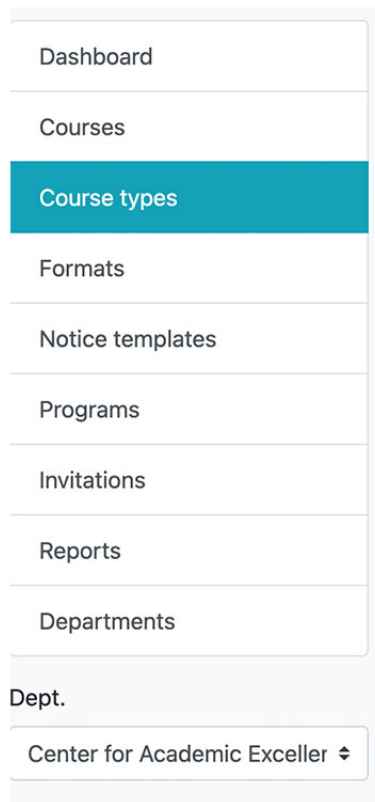

Tip: It is best to have between 5-8 categories that your workshops will fall under. Having too many categories makes it difficult to manage statistics for Annual Reporting and can be confusing for registrants.

Examples of Workshop Course Types from the Center for Academic Excellence (FAD):

- Diversity, Equity, and Inclusion
- Career Support and Advancement
- Teaching and Learning
- Grants and Research
