

# Quiz: Overrides

AsULearn allows you to override selected quiz settings for individual students and groups of students. This is very useful when you have a student that needs extended time on a quiz because of a documented Americans with Disabilities Act accommodation plan, when a student who needs to take the quiz at a different time because of an excused conflict, or when a section (group) of students in a metacourse needs access to the quiz on a different day/time (instead of making two quizzes, use the same quiz with a group override). The following video walks through adding an override:

Additional key words: quiz extension, exception, absence, test, testing

## Step-by-step guide

To set an override for a course quiz:

1. On your course page, click the link to the quiz you want to configure. The Quiz Summary page will open.
2. In the tabs along the top, click the **More** item, then select **Overrides** from the dropdown menu:

3. Use the left dropdown menu to choose either **User or Group overrides** to apply an override to a specific user. **User overrides** apply to a specific individual user. **Group overrides** apply to all of the members of an existing group (very commonly a section group in a metacourse). **NOTE**: If students are not in a group, overrides must be applied one student at a time. Once you have selected an override type, click the blue **Add user(or group) override** button.

4. On the Override screen, **Search** (use the dropdown menu or type a name) and select the User or the Group Name for student or group who require the override. Enter the new parameter(s), such as quiz availability, time limit, number of attempts. Any parameter left unchanged will match the original settings for the quiz.

## ▼ Override

Override user  × No selection

Require password   

Open the quiz       ☐ Enable

Close the quiz       ☐ Enable

Time limit    ☐ Enable

Attempts allowed 

[Revert to quiz defaults](#)

[Save](#) [Save and enter another override](#) [Cancel](#)

Modify the settings you want to override. The parameters you can adjust are:

- **Require password:** Faculty can specify a unique password for just this particular student. (Not usually necessary)
- **Open the quiz, Close the quiz:** Specify separate open and close dates and times that apply only for this particular student or group.
- **Time limit:** Adjust the duration that this student or group has for taking the quiz, or you can disable this entirely (uncheck the **Enable** setting) if you want to give the student an unlimited amount of time to finish the quiz.
- **Attempts allowed:** Specify how many attempts at taking the quiz this particular student or group is allowed.

5. To clear any changes click the **Revert to quiz defaults** button.

6. Click **Save** when you are finished, or to repeat this for more students, click **Save and enter another override**, or click **Cancel** to abandon creating this override.

If a student is being given another attempt after they have already taken the quiz, you will need to increase the number of **Attempts allowed** here for the student to take the quiz again. That is, set the attempts to 2 to give them a 2nd attempt.
