Student use

- Getting notifications
- Checking grades
- Reading discussions and files
- Viewing videos
- Reading and sending messages

Instructor use

- Reading discussions
- Reading and sending messages
- Grading activities (simple grading methods only for now)

Offline features

Most course activities and materials can be downloaded for offline use. Calendar events can be viewed and private messages can be sent to course participants offline. Links to materials outside of AsULearn (such as YouTube videos or external tool activities) will not be included in downloaded course materials. [Only quizzes with specific settings may be attempted offline.](#)

Logs

Interaction with core activities (see above) will be logged. Interaction with third party plugins with mobile app integration will also be logged, however few plugins have full mobile app integration yet. If students have difficulty completing an activity with the mobile app, always refer them to [web application](#). Ask your college consultant if you have questions about a specific activity or resource.
