

How to Configure ASU Wireless on macOS

This guide shows you how to connect your University-owned Mac to the AppState secure wireless network called "asu".

 This does not pertain to the network called "asu-secure".

1. Click on the Wi-Fi icon in the top right corner of the menu bar, and click on "asu" from the list of available networks.

 **Note:**
If you don't see the Wifi icon, you can find the Wifi Settings by clicking the Apple logo in the top left of the menu bar, opening "**System Preferences**" and clicking on "**Network**".

2. In the pop-up window, enter your App State credentials and then click "Join". You should now be connected to the "asu" network.

3. If this is your first time connecting this machine to the "asu" network, you will need to register this device. To do this, open a web browser and navigate to netreg.appstate.edu.

Netreg2 - Login

https://netreg2.appstate.edu

NetReg Network Support Services

Netreg Network Registration System

Welcome to the ASU Network Registration System.

Please login as an ASU User or UGuest:

ASU Login Name:

Password:

OR Please login as a Visitor to the ASU Network

Visitor Email Address

Logging in as a guest/visitor user indicates you have read and accepted the [Acceptable Use Policy](#).

- You must wait 15 minutes for registration to take effect and you may need to reboot your device.
- Students are allowed 4 device registrations and Faculty/Staff are allowed 5 registrations on the "asu" secure network.
