

Reset the Keychain using Self Service on macOS

In some cases, after you change your App State password your macOS Keychain can get out of sync. With this guide, you'll reset the keychain and re-sync your passwords.

WARNING: Resetting the Keychain will remove any saved passwords you had previously saved in Keychain.

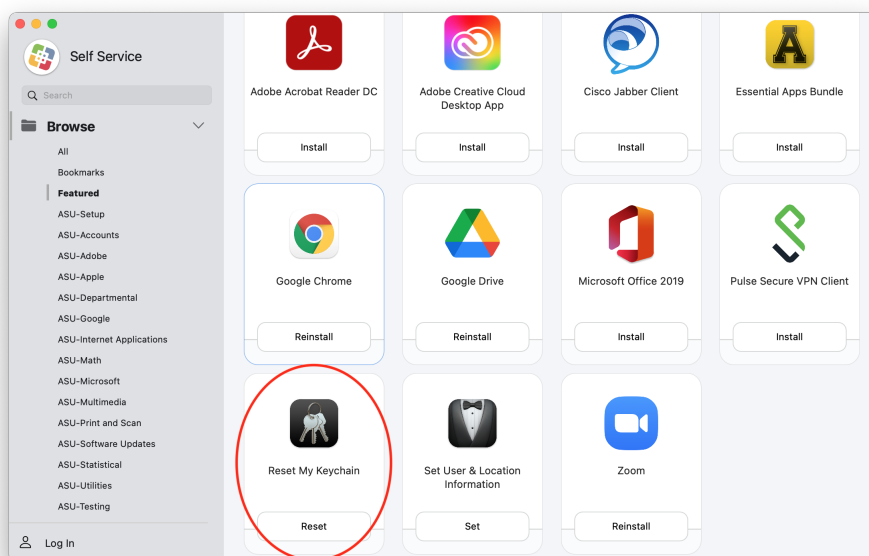

Step-by-step guide

1. Open the Self Service Application.

2. In the search bar, search for **Reset My Keychain**, click **Reset**.

Note:
You'll be prompted to restart your computer, so it's best to have all other applications closed.
