

Clean Address

Website

runneredq.com

Summary

CLEAN_Address is a development component for easily verifying and standardizing Global addresses through Oracle database applications. Addresses can be verified in real-time or batch using a simple PL/SQL procedure call. This saves data entry time, protects against fraud, reduces costs of re-shipping, and allows duplicate address detection. App State utilizes the pre-built interfaces for Banner.

Who can use this service?

Access to these modules is limited by employee role.

Who do I contact for problems or issues?

Call the Help Desk at 828-262-6266, Monday through Friday, 8 a.m. to 5 p.m., or enter a support request at support.appstate.edu.
