

# IT Project Management Services

## Websites

- [Current Projects](#)
- [IT Project Management Office](#)

## Summary

IT Project Management Services delivers needed and innovative IT services for the App State community while working to advance App State's strategic objectives.

Services provided by IT Project Management Services include

- project planning
- risk management
- project communications
- quality control
- documentation and reporting
- stakeholder management

These services are provided by IT Project Managers who possess the skills and expertise to work with project teams to organize, track and execute work within the project schedule.
