

Operational Data Store

Website

appleap.appstate.edu/reporting

Summary

The Operational Data Store Database is a Reporting Data Warehouse that contains the Banner Operational Data Store (ODS) a data mart regularly populated by Banner data, and other Student, Advancement, and Financial historical and archival data. The Banner Operational Data Store extracts information from Banner administrative systems, organizes it into a simplified format, and stores the information in the ODS database where users can create and deploy operational and ad hoc reports. It is accessed with various Reporting Tools - primarily with Webfocus.

Who can use this service?

Access to Banner Operational Data Store is defined by employee role.

How do I request this service?

Access is requested through the Banner Functional Area Security Officers.

Who do I contact for problems or issues?
