

Risk Assessments and System Testing

Website

security.appstate.edu/services

Summary

The Office of Information Security (OIS) evaluates and tests software, data procedures, and physical environments for potential security issues and helps identify possible measures that can help lower risks.

Risk assessment and security testing services

- Department Risk Assessment - We identify procedural and technical risks that may give rise to information security or business continuity concerns.
- Vulnerability Scanning - We scan networked devices and servers to identify common security issues and identify resolutions.
- Software Testing - We review software applications and agreements to determine potential security risks.
- Web Application Testing - We test web applications for common flaws and security weaknesses that might result in a security compromise.

Who can use this service?

Unit Leaders, Project Leads, System Administrators
