SAS

Website

support.sas.com/software/products/sas-studio/faq/SAS_whatis.htm

Summary

SAS is a system of software products that assist programmers in a variety of areas including (but not limited to)

- data management and warehousing
- statistical analysis
- business planning
- operations research
- applications development
- remote computing

All SAS software has been provided free as part of a $3 million grant from the SAS Institute to the University of North Carolina system.

- Version 9.3 on the Alpha/VMS cluster and Windows
- Base SAS, SAS/STAT, plus 20 subsystems
- Enterprise Guide - point and click access to SAS
- JMP - interactive statistical graphics (for Windows and Mac)
- SAS Enterprise Miner for Data Mining

Obtain a license for personal use:

Submit a Software License Request.
