# Security Awareness

## Website

[security.appstate.edu](security.appstate.edu)

## Summary

Ensuring security awareness and training is crucial to bridging the gap between data protection and human interaction with that data.The Information Technology Services Security website: [security.appstate.edu](security.appstate.edu) is where users can find information about basic computer security as well as the latest phishing attempts on campus.

To guarantee robust security, all desktops and laptops provided by App State are equipped with the University-build. This build automatically provides the essential three security requirements: automatic updates, up-to-date antivirus, and a properly configured host firewall.

For student and personal computers, there is security and antivirus information at: [support.appstate.edu/services/antivirus](support.appstate.edu/services/antivirus)
