Apple School Manager

Website

school.apple.com

Summary

Apple School Manager is a simple, web-based portal that helps IT administrators deploy iPads and Macs in schools. They can easily provide students and staff access to Apple services, set up devices, get apps and books, and enable faculty with tools to create engaging learning experiences — all from one place.

Who can use this service?

Faculty and Staff

How do I request this service?

Submit a ticket to EMACS with the requested access level to the specific service (Content Manager, Device Enrollment Manager, or Instructor)
