

Respondus LockDown Browser and Monitor

Website

web.respondus.com/he/lockdownbrowser

Summary

Respondus LockDown Browser is a custom browser that students download and use that locks down a testing environment while a student takes a quiz in AsULearn. During the exam, the student is unable to copy or print the exam for other students, access other applications, or visit other websites.

Respondus Monitor builds on the power of LockDown Browser by using a student's webcam to record video and audio of them while taking the exam. Using industry-leading video analytics, the Monitor will flag any behaviors that may represent instances of cheating. Instructors can then view the recording and decide for themselves.

Respondus LockDown Browser does not work on most mobile devices and the use of Chromebooks is not advised.

Who can use this service?

Faculty, Staff, and Students

How do I request this service?

Call the Help Desk at 828-262-6266, Monday through Friday, 8 a.m. to 5 p.m., or enter a support request at support.appstate.edu.
