Statuspage for Jira Service Management

Website

status.appstate.edu

Summary

App State's Systems Status Dashboard is used to provide students, staff, and faculty information about the operational status of App State services including widespread outages.

IT staff will list any newly created incidents, updates to already listed issues, and the resolution to all incidents. Also listed on this site are regularly scheduled maintenance dates and a list of past incidents.

Who can use this service?

Faculty, staff, students, and the public
