

Eventus SAS Add-On

Website

eventstudy.com/Eventus-and-SAS.htm

Summary

Eventus runs in The SAS System to allow users to combine the statistical and data-handling power of SAS with event study methods. Options allow users to tailor data input, estimation, and statistical testing. Every Eventus program is also a SAS program and can create SAS data sets containing specific types of results.

Who can use this service?

Faculty in the Department of Finance, Banking, & Insurance
