Research Computing / High Performance Computing

Website

[Research Engineering and Support](#)

Summary

The goal of research computing at App State is to provide modern computational tools, IT infrastructure, and development support for App State researchers. If you are interested in computational research or high-performance computing and would like to join our group, please contact any member of the group. If you have E&T funds, we can help you spend them in the way most cost-effective for education and research. Contact us about long-term storage and access.

Who can use this service?

Research faculty and sponsored students
