

# Reset Date & Time on Mac

Date and time can get out of sync on Mac computers, which causes issues with connecting to **asu** wifi and other systems and settings.

1. In the upper-right corner of your screen, click on the circle with the checkbox and select request administrator access.

2. From the Apple Menu in the upper left corner, Open System Settings > General > Date & Time
3. Turn OFF Set time and date automatically, then set the date and time manually.
4. Once it's set, turn ON Set time and date automatically, using Apple ([time.apple.com](https://time.apple.com)) as your source. Your settings should then look like the image below.
