

# YouTube Video: Embedding in your course

If you have uploaded a video to your YouTube account or want to link to an existing public YouTube video, here are the steps for adding that video to your AsULearn course.

**Pro-Tip:** If you upload a video to YouTube with the intention to use it in AsULearn, or any other site, make sure that in the YouTube **Video Details**, select **Allow embedding**. This will allow you to use the link. If you don't select **Allow Embedding** then the link won't function. Also, if you ever try using a publicly shared YouTube link and it doesn't work in AsULearn, then the original publisher of the video most likely did not **Allow embedding** of their media.

☒ Allow embedding ?

☒ Publish to subscriptions feed and notify subscribers

## Step-by-step guide

1. From the course page, enable the **Edit mode** toggle at the top right.
2. In your course, navigate to the desired topic/section and click **+ Add an activity or resource**.
3. Select the **Page** resource.

4. Enter a **Name** for your video. This should be a human-readable title.

5. Copy the URL of the video from YouTube. Click the Share link on the YouTube video is a quick way to copy the shortened link, and also get a specific time index in the video if you don't wish it to start that the beginning. Then, in the Content section > **Page content** field, paste the URL of the YouTube video.

## Adding a new Page

[Expand all](#)

### ▼ General

Name

Video: Completion Tracking

Description

☐ Display description on course page 

### ▼ Content

Page content

<https://youtu.be/Eth--devrC8>

6. If the URL you pasted was automatically converted to a hyperlink (blue text), proceed to the next step. If not, to manually insert the link, select the URL, copy it, and click on the **Link** icon.

### ▼ Content

Page content

<https://youtu.be/Eth--devrC8>

7. Paste the URL into the **Link URL** field, and click **Create link**. No need to worry about the text to display here, since it will not be shown. It will be replaced by the embedded video.

## Create link

Text to display

<https://youtu.be/Eth--devrC8>

Enter a URL

<https://youtu.be/Eth--de>

Browse repositories...

☐ Open in new window

Create link

8. Note that you can add additional informative or instructional text to the Page before or after the embedded video. You can also add multiple embedded videos to a single page if that suits the design of your particular task. Click **Save and display** when you're done.

A link to your new page with its title will be on your main course page. Clicking the link displays the page with the YouTube video embedded.
