

How to Configure ASU Wireless on macOS

This guide shows you how to connect your University-owned Mac to the AppState secure wireless network called "asu".

 This does not pertain to the network called "asu-secure".

1. Click on the Wi-Fi icon in the top right corner of the menu bar, and click on "**asu**" from the list of available networks.

 **Note:**
If you don't see the Wifi icon, you can find the Wifi Settings by clicking the Apple logo in the top left of the menu bar, opening "**System Preferences**" and clicking on "**Network**".

2. In the pop-up window, enter your App State credentials and then click "**Join**". You should now be connected to the "**asu**" network.

3. If this is your first time connecting this machine to the "asu" network, you will need to register this device. To do this, open a web browser and navigate to netreg.appstate.edu.

Netreg2 - Login
https://netreg2.appstate.edu

NetReg Network Support Services

Netreg Network Registration System

Welcome to the ASU Network Registration System.

Please login as an ASU User or UGuest:

ASU Login Name:

Password:

OR Please login as a Visitor to the ASU Network

Visitor Email Address

Logging in as a guest/visitor user indicates you have read and accepted the [Acceptable Use Policy](#).

- You must wait 15 minutes for registration to take effect and you may need to reboot your device.
- Students are allowed 4 device registrations and Faculty/Staff are allowed 5 registrations on the "asu" secure network.
