

Metacourse: Metagroup sync

For courses that use [Course meta link enrollments](#) and groups, the **Metagroup Sync** feature will automatically keep the Banner enrollments in your host section synced into a designated group, the same way your meta links can keep those enrollments synced to a designated group.

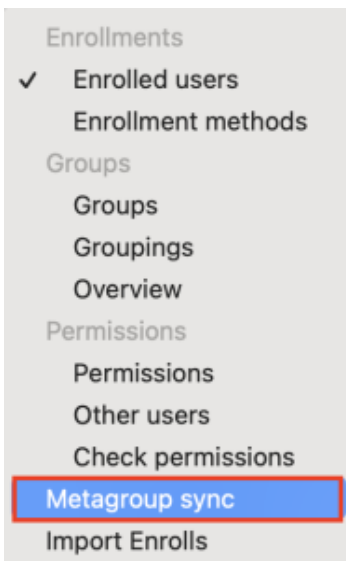

Step-by-step guide

1. From your course's Course Menu, click **Participants**:

MUS1005-101_AURAL SKILLS I (SPRING 2023)

Course Settings **Participants** Grades Reports More ▾

2. In the **Enrolled users** dropdown menu at the top left, select **Metagroup sync**:

3. Check the **Enable** checkbox:

Metagroup sync

 ☒ Enable ?

Preferred metagroup name  

4. The **Preferred metagroup name** is editable. Type your preferred group name, or accept the default name (example: MUS1005-101_AURAL SKILLS I (SPRING 2023) course).
5. Click **Save changes**. You'll see a Success banner. Now any and all current **and future** Banner enrollments in the course will be sync to this group. Remember, your course meta link enrollments are synced to groups also, if you chose that option. So, once set up, all your group memberships in your combined course are dynamically maintained and you never have to worry about them again. You can now navigate away from the setup page. If you check your groups, you'll see the group was added and all the banner enrolled students are members.
