

Email Tagging

Email Tagging incorporates the use of a tag in the subject line of email messages to allow for easy identification of message categories and content.

Email Tags are automatically added to the subject line of inbound messages to identify messages that meet certain parameters.

App State currently utilizes these message tags:

- [EXTERNAL]
- [BULK]
- [MARKETING]
- [SOCIAL NETWORK]
- [SUSPECTED SPAM]

[EXTERNAL] Email Tagging

External Email Tagging is where the tag “[External]” is added to the beginning of the subject line for all email messages that were sent from external sources. In other words, messages not from @appstate.edu that have additionally not been marked as a trusted sender internally.

The [External] tag is there to help you to realize the message did not originate from an [appstate.edu](mailto:@appstate.edu) email address. With a message tagged as [External] you need to consider:

- Exercise caution on all external messages, especially with links or attachments you are not expecting.
- Is it from a sender you know? Were you expecting the email? Verify with the sender of the message over the phone if you are unsure or if the email seems a bit off.
- Does the message make sense? A legitimate message would not ask you to provide your credentials to maintain your account access.

[BULK] Email Tagging

[BULK] Email Tagging identifies and flags messages sent in bulk by marketing groups

- often these messages are from reputable senders that pass SPAM filtering
- These messages could be wanted by the end-user or could be seen as SPAM
- These messages will often have an unsubscribe option

[MARKETING] Email Tagging

[Marketing] Email Tagging identifies advertising messages sent by professional marketing groups.

- These messages are used for promoting products and services
- Marketing messages are not considered spam, but end-users may not want to receive them

[SOCIAL NETWORK] Email Tagging

[SOCIAL NETWORK] Email Tagging identifies messages from social networks, dating websites, and forums.

- Examples include alerts from LinkedIn, CNET forums, Facebook, YouTube

[SUSPECTED SPAM] Email Tagging

[SUSPECTED SPAM] Designates messages that have not qualified as spam after scoring algorithms have been applied, but are most likely SPAM.

Email Tagging Questions and Answers:

Q: Are [EXTERNAL] tagged messages dangerous?

A: No. Many legitimate messages come from external sources. The [EXTERNAL] tag helps bring attention to email messages that are not from the University assisting in the detection of possible phishing campaigns.

Q: Can I opt-out of or turn off message tagging?

A: No, message tagging is a service to help App State users identify and manage email and protect our email domain.

Q: I received an email that was tagged but it came from a source my department uses on a regular basis. Is there a way to get an exemption and remove a tag from a message?

A: Please submit a [support ticket](#) so we can evaluate whether it's appropriate to add an exception.

Q: When I reply to an external message will the recipient see the external tag?

A: No, the external tag is not visible to the recipient.

Q: Will I see other possible tags appended to email subject lines?

A: Yes, it is possible to see additional appended tags. Tags can originate from Google Groups and approved senders.

Using Message Tags to filter messages

Message tags can be used to remove unwanted messages from the Inbox, creating a more focused Inbox.

1. Open the App State Gmail web interface and click on the **settings gear** in the top right corner.
2. Click the **See all settings** button
3. Click the **Filters and Blocked Addresses** link
4. Click **Create a new filter**
5. In the subject line enter **one** of the message tags [EXTERNAL] [BULK] [MARKETING] [SOCIAL NETWORK] and click **Create filter**

From

Subject

Has the words

Doesn't have

Size

Has attachment Don't include chats

[Create filter](#)

6. Select the **Apply the label** checkbox and create a new label to move identified messages to.

← When a message is an exact match for your search criteria:

- Skip the Inbox (Archive it)
- Mark as read
- Star it
- Apply the label: Social Network ▾
- Forward it [Add forwarding address](#)
- Delete it
- Never send it to Spam
- Send template: No templates ▾
- Always mark it as important
- Never mark it as important
- Categorize as: Choose category... ▾
- Also apply filter to **16** matching messages.

[? Learn more](#) [Create filter](#)

All inbound messages identified as Social Network will be moved from the inbox into a label. Please note that it is important to view filtered labels frequently to ensure tagging accuracy.
